

BECOME A Safe City OR COUNTY

3 STEPS TO Protect Life

IT'S UP TO US

For far too long, we have relied on the national, secular centers of power—the Supreme Court and Congress—to end the injustice of abortion and fix America's moral crisis. It's time for the Church to bring the battle for life, marriage, and family back into faithful rural America. It's time to end abortion, human trafficking, assisted suicide, passive euthanasia, and the exploitation of children at the local level and build a culture of life in our own backyards.

WHAT IS A SAFE CITY?

A safe city (or county) is a community that declares itself a place of safety for born and pre-born persons and their families, builds and strengthens Christian outreach and community networks, and ultimately, refuses to allow abortion and other direct assaults on human life and dignity to destroy the community.

WHY 3 STEPS?

This strategic approach promotes long-lasting growth, but even more importantly, it empowers the Church to reclaim charity and share the Gospel, which has inspired the political and cultural changes that are necessary to end the greatest injustices in history.

STEP
1

RESOLVE TO PROTECT

Make a broad, inspirational human rights declaration that recognizes the personhood of born and pre-born humans and the duty of the local jurisdiction to provide equal protection from conception to natural death, without exception.

STEP
2

ACTIVATE THE COMMUNITY

Educate the Church and the community about personhood and the ways in which our society has denied it. Build a coalition of churches, businesses, helping ministries, and local government to engage in specific actions that create a culture of life and a groundswell to advance personhood protections at the state and national levels.

STEP
3

DEFY UNJUST LAWS

Once your town has matured in its efforts to embrace a culture of life and is prepared for legal challenges, publicly and peacefully uphold the Biblical standard of justice by establishing local laws that ignore the *Roe v. Wade* decision and the myriad of laws that violate the personhood of vulnerable children and adults.
